

## Positioning Risk Management as a Critical Driver of Process Within a University

Karyn Hughes

Manager Risk Strategy and Risk, Deakin University

This presentation will provide an overview of the Deakin University approach to risk management. Deakin has had its risk management program in place for over 10 years, however it has been a challenge to develop a strategy which positions risk management as a critical driver of process within the University. Considerable focus over the last 2 years (and across the next 4 years) has been on embedding a culture that supports the identification and management of risk to assist the achievement of strategic goals. This presentation will provide an overview of the approach taken to risk management at Deakin, with a focus on systems and efficient processes to reduce the perceived compliance burden and how to engage the academic community through these processes.
